SUMMARY

Cybersecurity-focused Computer Science and Engineering student with a strong inclination toward responsibility-driven roles that require coordination, communication, and execution. Known for working effectively with people, managing tasks in dynamic environments, and ensuring smooth outcomes under pressure. Brings a balanced approach that blends technical understanding with practical leadership and organizational skills. Currently pursuing a B.Tech at Muthoot Institute of Technology and Science (MITS) with a continuous drive to learn, take ownership, and contribute meaningfully to impactful initiatives.

EXPERIENCE

Chief Operations Officer

IEDC MITS

February 2026 – Present, Ernakulam, Kerala

- Leading operations and overseeing planning, coordination, and execution of IEDC activities.
- Successfully organized the **Startup Summit Pre-Event** at the college level.
- Coordinated and executed key events including **Women's Day** and **Annual General Meeting (AGM)**.
- Managing team workflows and ensuring smooth execution of initiatives within a short span of joining.

Operations subcom

IEDC MITS

March 2025 – January 2026, Kochi, Kerala

- Organized and managed the **Start-up Rise** event, overseeing planning, team coordination, participant handling, and smooth execution.
- Represented **IEDC MITS** as a volunteer at **Huddle Global 2025** in Trivandrum, contributing to large-scale event operations.
- Selected directly for the **IEDC Summit** volunteer team based on performance and operational skills.
- Actively contributed to the successful execution of **NOVA '26**, the flagship event of IEDC.

Membership Development Subcom

IEEE SB MITS

May 2025 – January 2026, Kochi, Kerala

- Actively contributed as a team member of **IEEE SB MITS** to membership drives.
- Played a key role in achieving **90+ successful IEEE registrations** through coordinated outreach and teamwork.
- Supported promotional and engagement activities to increase student participation and awareness of IEEE.

PROJECT

Ammunition Inventory Managment

Muthoot Institute of Technology and Science • February 2026 – Present

- A secure relational database solution for tracking high-risk munitions through manufacturing lots, automated safety protocols, comprehensive audit trails.

Instant Notify: Caller Availability System

Muthoot Institute of Technology and Science, as part of the course PBCCT304 – Basic Concepts in Computer Networks

- June 2025 – November 2025
- I worked on designing and implementing a **hybrid Client–Server and Peer-to–Peer communication system** that automatically notifies a caller when the receiver becomes available.
- The system uses a **central TCP server** to manage user registration, call signaling, and availability status. When a user is busy, callers are added to a waiting list. As soon as the user becomes free, the server **instantly notifies the waiting caller**, eliminating repeated call attempts.
- For real-time voice communication, the system switches to **direct peer-to-peer audio streaming using UDP**, ensuring low latency. The application was implemented using **socket programming, threading, TCP/IP, UDP, and audio handling libraries**, and provides a **command-line interface** for call control (call, accept, reject, hangup, who). The project successfully demonstrates efficient call management and instant availability notification.

EDUCATION

Bachelor of Technology

Muthoot Institute of Technology and Science • Puthenkurish, Kerala • 2028 • 7.00

Higher secondary

Chavara Public School • Pala, Kerala • 2024

SKILLS

- Operations Management
 - Event Planning & Execution
 - Team Coordination and Collaboration
 - Communication & Interpersonal Skills
 - Leadership
 - Problem Solving

 - Python (Programming)
 - C Programming
 - JavaScript
 - HTML5
-
